WORK EXPERIENCE

Luno, Software Engineer II, Web

Full-time, February 2023—Present

Lead a small team to develop the new company's design system and built more than 30+ web components. Luno uses Angular as its framework of choice.

Rock, Frontend Engineer

Full-time, September 2021—January 2023

Helped develop new features for the web and desktop client. Working remotely from Jakarta with teams from US, India, and Europe. Working extensively with Vue and TypeScript.

~ Developed Pinboard, a new feature for space admin to be able to pin messages and objects for future references in a mini app
~ Developed credits and referral programs for affiliated users
~ Developed task imports/exports feature to give the ability to users migrate their task board
~ Developed Slack import to easily migrate messages from Slack
~ Developed user's status and indicator when users are online
~ Developed Loom integration to be able to send screen recordings within the app
~ Developed feature to send GIFs images and reactions
~ Developed link previews in the chat message

Bukalapak, Software Engineer, Frontend

Full-time, October 2017—October 2021

Involved in Core User squad. Taking care of millions of Bukalapak users. Scopes include: leveling up user safety with two-factor authentication, login and register page, and password resets. Bukalapak employs a microfrontend architecture implemented with Vue and Node.js.
